4. Ghendt (Gent) , by de Weduwe ende Hoirs van Jan vanden Kerckhove, met Privilegie, 1644, small in-4°, 19,5 x 15,5 cm, 20 nn pp, title with woodcut coat of arms, with a contemporary note in ink by a secretary confirming the transmission of the decree. Text in Dutch. Decree (placcaet) emanating from the Coucil of Flanders (Raad van Vlaanderen) to regulate the import of copper ore and copper wares in order to enhance the quality of copper wares. The first such decree dates from 15th Nov. 1588 and needed obviously some adaptations. The import of copper ware and ore from Aachen (Germany) and Stahlberg-Schmalkalden (Thuringen) is strictly forbidden because it is of inferior quality. Only copper ore from Limburg (from the Ardennes area via the Meuse river ?) can be used. The children of copper workers from Namur and Bovignes who settled in Flanders since 1554 have one year to leave the country. (history of copper mining, copper production , use of copper in 17th century Flanders, koperbewerking, koperwaren).
