

Yule (G. Udni)

An Introduction to the Theory of Statistics - Griffin's Scientific Text-Books

Référence : 101475

Charles Griffin and Company, London Malicorne sur Sarthe, 72, Pays de la Loire, France 1932 Book condition, Etat : Bon hardcover, editor's red printed binding, no dust-jacket In-8 1 vol. - 449 pages

Commentaire : 53 black and white text-figures and diagrams 10th edition, 1932, revised Contents, Chapitres : Preface to the tenth edition, Preface to the first edition, Contents, xv, Text, Appendices, Supplements, Additionnal references, Answers to, and hints on the solution of, the exercises given, Index, 434 pages - Introduction - 1. The theory of attributes : Notation and terminology - Consistence - Association - Partial association - Manifold classification - 2. The theory of variables : The frequency-distribution - Averages - Measures of dispersions, etc - Correlation - Correlation : Illustrations and practical methods - Miscellaneous theorems involving the use of the correlation-coefficient - Partial correlation - 3. Theory of sampling : Simple sampling of attributes - Simple sampling continued : effect of removing the limitations of simple sampling - The binomial distribution and the normal curve - Normal correlation - The simpler cases of sampling for variables : percentiles and mean - Appendices : Tables for facilitating statistical work - Short list of works on the mathematical theory of statistics, and the theory of probability near fine copy, the editor's binding is near fine, corners very lightly worn, spine torn on 1cm on the middle and a small missing on the top, inside is fine, clean and unmarked, without dust-jacket
