

Acheson (George H.), Main Editor - Cochin (Joseph) - Okita (George T.) - Loomis (Ted A.) - Bloom (Floyd E.) - Maxwell (Robert A.)

Pharmacology and the Future of Man - Proceedings of the Fifth International Congress on Pharmacology, San Francisco, July, 23-28, 1972 , Volume 1. Drug Abuse and Contraception - Volume 2. Toxicological Problems - Volume 3. Problems of Therapy - Volume 4. Brain, Nerves and Synapses - Volume 5. Cellular Mechanisms

Reference: 63979

S. Karger Malicorne sur Sarthe, 72, Pays de la Loire, France 1973 Book condition, Etat : Bon hardcover, editor's binding, no dust-jacket grand In-8 5 vol. - 2074 pages

Comment: 492 figures and 250 tables 1st edition Contents, Chapitres : Volume 1 : Drug Abuse and Contraception , xviii, Text, 300 pages, 41 figures and 37 tables - Volume 2 : Toxicological Problems , xviii, Text, 242 pages, 37 figures and 27 tables - Volume 3 : Problems of Therapy, xviii, Text, 507 pages, 151 figures and 75 tables - Volume 4 : Brain, Nerves, and Synapses, xviii, Text, 484 pages, 141 figures and 48 tables - Volume 5 : Cellular Mechanisms , xviii, Text, 451 pages, 120 figures and 63 tables - For the Complete Set : XC, Text, 1984 pages, 492 figures and 250 tables - Volume 1. Drug Abuse and Contraception : Drugs and society - Contraceptive drugs - Volume 2. Toxicological Problems : Toxicological problems affecting the future of man - Enzyme activation of drugs - Mechanisms of toxicity by therapeutic and environmental agents - Chemistry and pharmacology of purified toxins - Volume 3. Problems of Therapy : Genes controlling drug actions in man - Combination drug therapy, good or bad - The basis of drug therapy in man - Biochemical and clinical pharmacology of blood-sugar-lowering sulfonylureas - Fundamental approaches to cancer chemotherapy - Volume 4. Brain, Nerves and Synapses : The influence of neurotropic substances on the brain functional systems - Pharmacological agents on memory and learning - Biochemistry and pharmacology of sleep - Importance of sensory endings as a site of drug action - Measurements of catecholamine turnover rates, relationship to neuronal function - Regulation of 5-HT synthesis and turnover in the brain - The Mast cell and its biogenic amines - Blood platelets as a model for aminergic neurons - Na-Ca interactions as a pharmacological trigger - The bearing of membrane and transport studies for pharmacology - Time and dose relationships in the theory of Quantal drug responses - The pineal gland, a neurochemical transducer - Cocaine : Pre and postjunctional effects - Muscarinic inhibition of the norepinephrine release from peripheral sympathetic fibres - Recent advances in smooth muscle pharmacology - Volume 5. Cellular Mechanisms : Molecular selectivity of taste and smell receptors - Cholinergic receptor mechanisms - Recent studies on the cholinergic receptor protein of the eel electroplax - Physiological effects and pharmacological implications of cyclic AMP and other nucleotides - Pharmacological implications of cyclic nucleotides - The Kinin trail - Kinin peptides - Prostaglandins and aspirin-like drugs - Immunopharmacology no dust-jacket, the set is complete in 5 volumes (there is no box, just the 5 volumes). Some very light spots on the clothes of some of the volumes, else fine copy, no markings, inside is fine

Year

1973

Price: **€45.00**
