

ALEMBERT (Jean Le Rond dit D'ALEMBERT) -- D'ALEMBERT

Traité de l'équilibre et du mouvement des fluides pour servir de suite au traité de dynamique ---- BEL EXEMPLAIRE

Reference: 14740

P., Briasson, 1770, un volume in 4 relié en pleine basane marbrée, dos orné de fers dorés, tranches rouges (reliure de l'époque), 46pp., (1-privilege), 476pp., 10 planches dépliantes

Comment: ---- BEL EXEMPLAIRE ---- Nouvelle édition REVUE ET AUGMENTEE PAR D'ALEMBERT ---- "A companion volume to the Traité de dynamique. In this work D'Alembert used his principle to describe fluid motion, treating the major problems of fluid mechanics that were current... D'Alembert first treatise had been devoted to the study of rigid bodies ; now he was giving attention to the other class of matter, the fluids. He was actually giving an alternative treatment to one already published by Daniel Bernouilli, and he commented that both he and Bernouilli usually arrived at the same conclusions. He felt that his own method was superior... The present work applies D'Alembert principle to fluids". (DSB I p. 113)**1474/ARM3-1469/i-1472/ARM3

Price: **€3,000.00**
